IMPERIAL

IMPERIAL HANDCRAFTED STONE & MARBLE

Cool and sensual. Real stone and marble has been the first choice to grace the finest homes since classical times: for buildings, floors, walls and of course, the most luxurious bathrooms. The Imperial Stone & Marble Collection of handcrafted basins and worktops is something excitingly different: an opportunity to style your bathroom with a touch of unashamed decadence, luxury and individuality.

Each bowl and worktop has been made from a separate solid piece of stone - this gives each piece its own individual character and uniqueness: no two pieces are ever the same.

STONE & MARBLE BOWLS

We have a very simple philosophy: we bring together the ultimate fusion of the finest in nature.

In stone you can choose from the gentle curve of the Agri bowl, or the bolder upright lines of the Denzil.

In marble there is the hand made modern square of the Attis, or the elegant classical shape of Selene. Both styles are available in 'light', 'mid' or 'dark' tones to ensure that whatever your bathroom mood, we are sure to have the ideal basin for you.

All basins come with a free-flow chrome waste and are set off to perfection on our specially designed selection of modern and classical timber basin stands and tapware: the ultimate fusion of the finest in nature.
